# Grazing Muzzles

Safe and comfortable, **Best Friend™ Grazing Muzzles** are recommended by equine health professionals to prevent, as well as treat Laminitis, founder, and obesity.

What Is Laminitis?

Read about how a muzzle can help you care for your horse by following this link.

Muzzling Your Horse's Appetite  
by Jeanene Tessari

The small opening in the bottom allows horses a limited amount of grass, yet unlimited water. Rather than being restricted to a non-grass environment to control intake, horses are free to exercise and socialize as part of the herd. The lightweight muzzles resist rubbing and chafing and will not rot.

**Best Friend™ Grazing Muzzles** can also be used as a training tool to discourage bad habits such as nipping and cribbing.

**Best Friend™ Grazing Muzzles** are available in two styles: Deluxe and Standard. The body of each muzzle is made of soft, comfortable webbing with neoprene padding on the noseband to help prevent rubbing. The bottom is made of flexible and durable reinforced rubber. Both designs have a breakaway feature that will hold in place under normal circumstances, yet will break away if a horse panics and struggles to free itself. This feature

greatly reduces the risk of injury to the horse.

The muzzles are entirely synthetic, and therefore rot-free and easily cleaned. To clean, simply hose off the dirt or swish the muzzle in a bucket of water.

Each muzzle is packaged in a vinyl bag that is reusable as a grooming tote.

## John Lyons' Perfect Horse Re

### The Best Friend™ Deluxe Grazing Muzzle \$:

The Best Friend™ Deluxe Grazing Muzzle is a combination Grazing breakaway halter all-in-one. The design utilizes a plastic side-release breakaway feature. Each Deluxe muzzle comes with a spare buckle that is attached in the field.

Five Sizes: Large Horse, Horse, Cob, Pony and Mini

- 5-Way Adjustable System

To use, adjust The Best Friend™ Deluxe Grazing Muzzle to the horse using the same principles as the fit of a comfortable halter. Leave approximately one inch between the horse's mouth and the inside of the muzzle. The Deluxe muzzle has a roomy fit to allow for chewing. You should be able to fit two to three fingers sideways between your horse's face and the muzzle.
